

Figure 3. Percent C remaining in cover crop aerial and root residues during spring decomposition. FP = field pea; DR = daikon radish; OT = oat; MX = mixed cover crops. *, **, *** Significant at the 0.05, 0.01 and 0.001 probability levels, respectively; ns = non-significant. Litter bags were placed in the field on November 15, 2020 and November 6, 2021 and collected every two weeks from April 1 – June 10 the following spring.
