

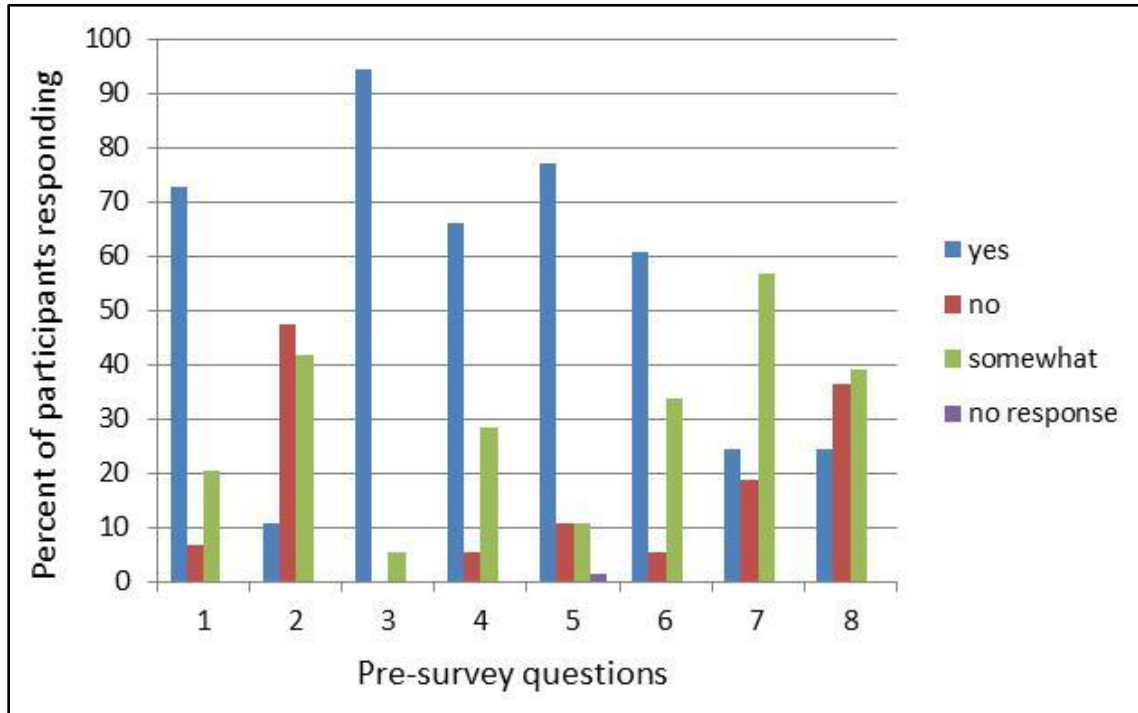

Figure 9. Results from pre-surveys (questions 1-8; all participants).

Survey questions:

1. Are you aware of the issues surrounding the disappearance of honey bees and the decline of other pollinators?*
2. Are you familiar with the diversity of native bees and their life cycles?*
3. Would you like to learn more about the diversity of native bees and their lifecycles?
4. Are you comfortable distinguishing bees from other insects?*
5. Would you like to learn more about distinguishing bees from other insects?
6. Are you familiar with the process of plant pollination, and crop plants that depend on insects and other animals for pollination?*
7. Are you familiar with common native plants of Montana?*
8. Are you familiar with habitat management practices that use native wildflower plantings to enhance food and habitat for pollinators?

Questions marked by an asterisk were used with permission from The Xerces Society (www.xerces.org).
