

Enrich Soil Health

Integrating Crops with Livestock

Join the National Center for Appropriate Technology and Montana State University

June 26, 2019 from 9:00 AM – 12:00 PM (Noon).

At the Fort Ellis Research Farm, 33336 Frontage Road – Bozeman, MT 59715.

There will be a tour of the Fort Ellis Research Plots and facilities as well as a discussion about the "Feedlot on Fields" research and integrating sheep into small-scale vegetable farming systems.

Learn how integrated crop-livestock production systems may provide sustainable alternatives to conventional methods and tillage practices and improve soil health and quality.

This event is free to attend. Light refreshments will be provided. Registration is required, reserve your spot here: (Place link here.)

Attendees must RSVP by June 21
