

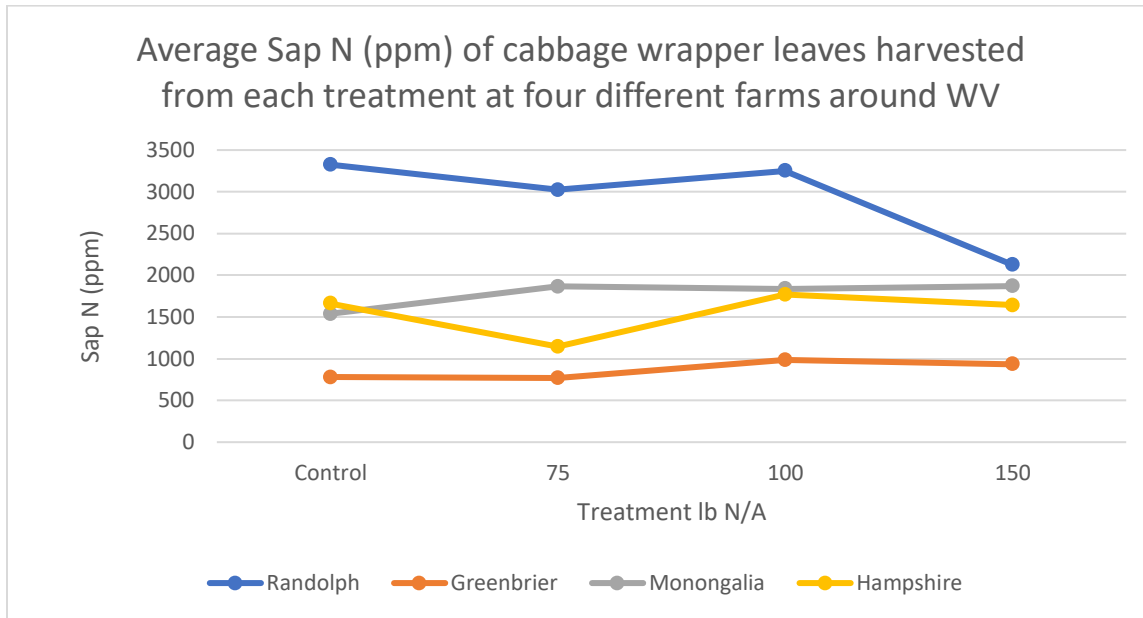

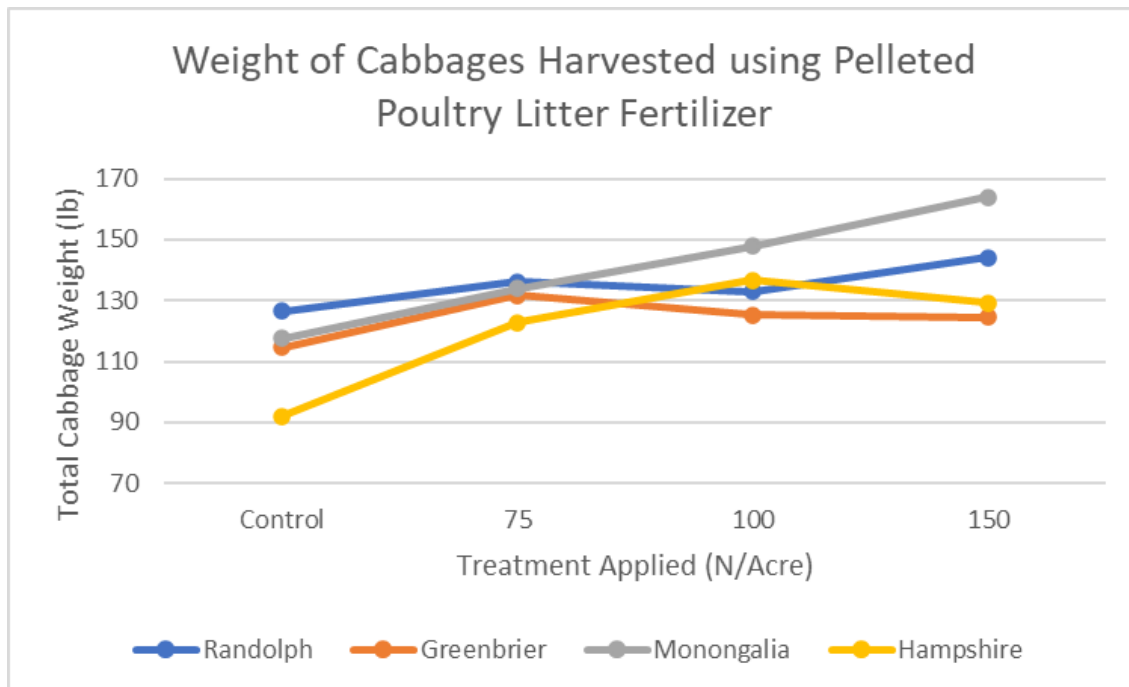

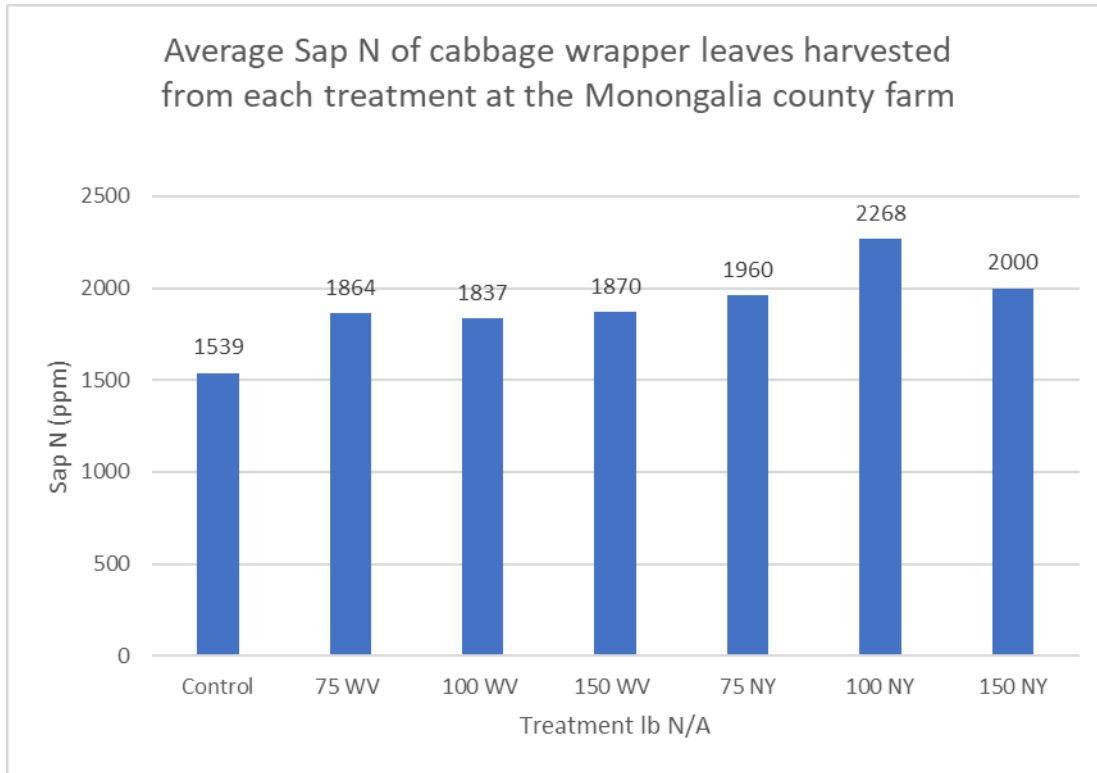

Graph 1. Average Sap N (ppm) of cabbage wrapper leaves from each treatment harvested from four different farms around WV.

Graph 2. Combined weights of all cabbages harvested for each treatment (Control, 75 lb N/A, 100 lb N/A and 150 lb N/A) at four farm locations across West Virginia.

Graph 3. Sap N (ppm) ratings from cabbages harvested from each treatment at the Monongalia County Farm. Litter was used from the WV farm and compared to Kreher Farm's Litter from NY.

Graph 4. Combined weights of all cabbages harvested for each treatment at Mountain Harvest Farm in Monongalia County.
