

Distribution of NRCS hedgerow at Frog Hollow				
*Begins at Smith Road entrance				
Plant	Notes	UPDATED LIST OF WHAT TO PUT	0=same plant, 1= empty space/ deergrass, 2= different plant	TWO YEAR PLAN FOR MANAGEMENT
Ceanothus 'Yankee Point'		Ceanothus 'Yankee Point'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Ceanothus 'Ray Hartman'		Ceanothus 'Ray Hartman'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Grindelia camporum		Grindelia camporum	0, pollen/nectar	1-2 times a month until good rains until established
Ceanothus 'Ray Hartman'		Ceanothus 'Ray Hartman'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
(Blank Area)		Grindelia camporum	1, pollen/nectar	1-2 times a month until good rains until established
Philadelphus lewisii		Salvia 'Daras Choice'	2, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
(Blank Area)		Lavendula stoechas	1, nectar	after established doesn't need more water, well drained soil, need good pruning and deadheading
Philadelphus lewisii		Grindelia camporum	2, pollen/nectar	1-2 times a month until good rains until established
(Blank Area)		Salvia Mellifera	1, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
Ceanothus 'Yankee Point'		Ceanothus 'Yankee Point'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Deergrass		Grindelia camporum	1, pollen/nectar	1-2 times a month until good rains until established
Deergrass		Ceanothus thrysiflorus	1, pollen	1-2 times a week with 1 inch of water in first growing season, reduce in second season, water every 3-4 weeks in next years, prune after first season
Ceanothus thrysiflorus	Dying	Grindelia camporum	2, pollen/nectar	1-2 times a month until good rains until established
Philadelphus lewisii		Salvia 'Daras Choice'	2, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
Arctostaphylos spp.		Lavendula stoechas	2, nectar	after established doesn't need more water, well drained soil, need good pruning and deadheading
Ceanothus thrysiflorus		Ceanothus thrysiflorus	0, pollen	1-2 times a week with 1 inch of water in first growing season, reduce in second season, water every 3-4 weeks in next years, prune after first season
Philadelphus lewisii		Phacelia cicutaria	2, pollen/nectar	needs adequate moisture in the spring/ summer, then little to no water once begins growing
Ceanothus 'Yankee Point'		Ceanothus 'Yankee Point'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Ceanothus 'Ray Hartman'		Ceanothus 'Ray Hartman'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Ceanothus 'Yankee Point'		Ceanothus 'Yankee Point'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Ceanothus 'Ray Hartman'		Ceanothus 'Ray Hartman'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Philadelphus lewisii		Vitex	2, pollen	cut back as flowering begins, water moderately
(Blank Area)	Room for -3 plants	Lavendula stoechas	1, nectar	after established doesn't need more water, well drained soil, need good pruning and deadheading
		Salvia Mellifera	1, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
		Ceanothus 'Ray Hartman'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Grindelia camporum		Grindelia camporum	0, pollen/nectar	1-2 times a month until good rains until established
Ceanothus 'Ray Hartman'		Ceanothus 'Ray Hartman'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Deergrass		Salvia 'Daras Choice'	1, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
(Blank Area)	Room for several plants	Phacelia cicutaria	1, pollen/nectar	needs adequate moisture in the spring/ summer, then little to no water once begins growing
		Phacelia cicutaria	1, pollen/nectar	needs adequate moisture in the spring/ summer, then little to no water once begins growing
		Salvia 'Daras Choice'	1, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
		Ceanothus 'Ray Hartman'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Philadelphus lewisii		Grindelia camporum	2, pollen/nectar	1-2 times a month until good rains until established
Arctostaphylos spp.		Ceanothus 'Ray Hartman'	2, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
(Blank Area)	Room for -3 plants	Salvia Mellifera	1, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
		Lavendula stoechas	1, nectar	after established doesn't need more water, well drained soil, need good pruning and deadheading
		Vitex	1, pollen	cut back as flowering begins, water moderately
Philadelphus lewisii		Ceanothus 'Ray Hartman'	2, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Ceanothus 'Yankee Point'	Marginal health--could remove	Ceanothus 'Dark Star'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
(Blank Area)	Large area--room for more than 3 plants	Ceanothus 'Ray Hartman'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Philadelphus lewisii		Ceanothus 'Dark Star'	2, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
(Blank Area)	Room for 2-3 plants	Phacelia cicutaria	1, pollen/nectar	needs adequate moisture in the spring/ summer, then little to no water once begins growing
		Ceanothus thrysiflorus	1, pollen	1-2 times a week with 1 inch of water in first growing season, reduce in second season, water every 3-4 weeks in next years, prune after first season
		Lavendula stoechas	1, nectar	after established doesn't need more water, well drained soil, need good pruning and deadheading
Coreopsis spp.		Salvia 'Daras Choice'	0, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
Grindelia camporum		Grindelia camporum	0, pollen/nectar	1-2 times a month until good rains until established
Deergrass		Ceanothus thrysiflorus	1, pollen	1-2 times a week with 1 inch of water in first growing season, reduce in second season, water every 3-4 weeks in next years, prune after first season
Grindelia camporum		Grindelia camporum	0, pollen/nectar	1-2 times a month until good rains until established
Deergrass		Ceanothus 'Dark Star'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
(Blank Area)	Large area--room for many plants	Salvia Mellifera	1, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
		Ceanothus 'Yankee Point'	0, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
		Ceanothus 'Ray Hartman'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
		Ceanothus thrysiflorus	1, pollen	1-2 times a week with 1 inch of water in first growing season, reduce in second season, water every 3-4 weeks in next years, prune after first season
Grindelia camporum	Large hedge of just Grindelia	Grindelia camporum	0, pollen/nectar	1-2 times a month until good rains until established
Deergrass		Lavendula stoechas	1, nectar	after established doesn't need more water, well drained soil, need good pruning and deadheading
Deergrass		Salvia 'Daras Choice'	1, nectar	1 times a month with 1/2 inch of water after established or during dry season, prune back after flowering
Grindelia		Grindelia camporum	0, pollen/nectar	1-2 times a month until good rains until established
Deergrass		Ceanothus 'Ray Hartman'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Grindelia		Grindelia camporum	0, pollen/nectar	1-2 times a month until good rains until established
Deergrass		Ceanothus 'Ray Hartman'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Deergrass		Ceanothus 'Dark Star'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
Deergrass		Ceanothus 'Dark Star'	1, pollen	1-2 times a week with 1 inch of water in first growing season, water every 3-4 weeks in next years, prune after first season
