Oregon, WI 53575

Dear Marie and Heidi,

We strongly support the project "Building sustainable relationships around the use of grazing cover crops on dairy and livestock farms in Southern Wisconsin" to increase the use of grazing cover crops.

Currently, we graze permanent pasture, but we would like to start grazing late fall cover crops after sweet corn harvest. In addition, we are interested in planting and grazing cover crops in years between sweet corn plantings to better improve our crop rotation.

We will provide stocking density data as well as economic data to support the project.

A handwritten signature in black ink, appearing to read "Kevin Oppermann", with a long horizontal flourish extending to the right.
