

T = Temperament (1=very calm/gentle, 2=nervous, yet workable, 3= aggitated, bumping, attempting to sting)
 C = Comb stability (1=still on combs, 2= disturbed yet covering combs, 3=exposing brood, dripping, parading)
 B = Area of comb used for brood (0.25 increments, ie. 3 frames with 1/4 of each side in use = 1.5 frames)
 P = Laying pattern (1= very few misses, prolific, 2=occasional miss, average layer, 3= shotgun, scant)
 M = Mite count per 1/2 cup of bees, W = total colony weight, H = # combs harvested, X = Found unmarked
