se you'd like us to know about the learning circle on Wednesday, ideas you have for upcoming learning circles, (

ucers seemed to have sheep, chickens, turkeys, even some pigs on pasture, i think it would be cool to learn mor

uch with all the women who were in the group. It was such a memorable experience and the location was perf

ere great. The speakers were helpful especially Lisa and the two from Penn State who demonstrated the carb

ery valuable day for me as soil/land health was already my top priority BEFORE the pandemic. Now I am picking

re about the benefits of rotating animals on pasture. Benefits for the animals (nutrition) and pastures alike.
ect! Bravo to everyone involved! The only suggestion I would make is to make some of the demonstrations mor
on and SOM. The field walk was informative. The food was very flavorful and delicious!! I want their recipes. It

g back up but feel WAY more informed about diagnostics and methods so I feel like this giant stewardship of m

tastes so healthy. Gay was fun and inspiring. Maybe having more time for question and answer, and our hand

ds on time for the experiments would have been nice, or would be nice for an upcoming in person meeting. It v

would be nice if there was more explanation about Microbes and how you can know what your microbial level is:

s in your soil, compare that to your current stage of succession, and where you need to be based on what crops

; you want to grow. It needs to be taught that lime and any salt base fertilizers are detrimental to the soil and s

shouldn't be applied.
