Project G.R.E.E.N.

Growing & Rewarding Educational Endeavors Naturally

Today's Presenters:

in Munster, IN

Michael Wells, Principal Brad Docter, Career & Ed Tech Coordinator Larry Hautzinger, Science Teacher Margaret Matanic, English/Theater Arts Teacher Ray Palasz, Auditorium Director Kim Peirick, AP Computer Science Teacher

Project description:

Project GREEN is a 3-5 year interdisciplinary project engaging students in STEAM based, hands on, experiential learning activities through the creation of a 21st century school garden.

The project touches on a number of areas including:

- Science education
- Water conservation
- Computer science
- Art & design
- Entrepreneurship
- Engineering
- Health/Wellness education
- Giving back to the community

Project Timeline

<u>Year 1</u>

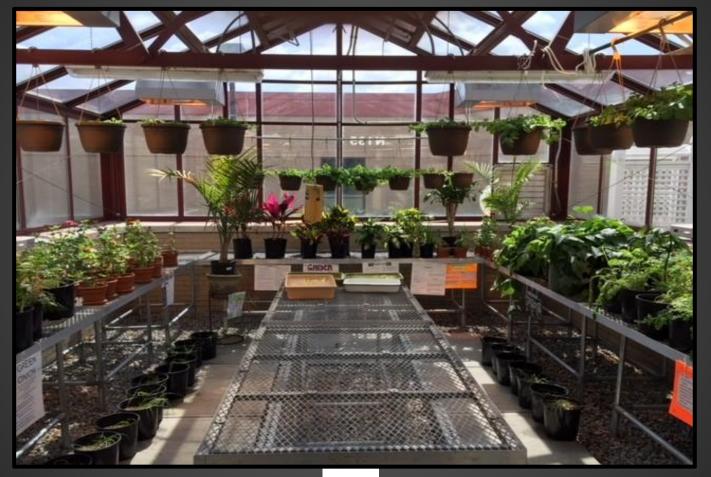

- Design and Build Rainwater Collection system.
- Design and Build Raised Garden beds.
- Plant vegetables
- Harvest a staff bounty table

<u>Year 2-3</u>

- Create & code a web platform for garden data analysis (temperature, soil PH, moisture levels etc.)
- Create a garden automation system.
- Host a community dinner with produce from the garden.
- Create ceramic serving ware used for the dinner.

<u>Year 3-5</u>

- Develop and Implement a Business plan.
- Market and sell goods at the Munster Farmers Market.

Elementary School Vegetable Garden

- The MHS Robotics team was instrumental in the building and planting of vegetable gardens at Eads Elementary School.
- Elementary students were actively involved in weeding and harvesting the produce.
- The vegetables harvested supplied a bounty table for the staff at the elementary school.
