

# NORTHEAST SEED CLEANING ROAD SHOW

Are you a seed grower with limited equipment? Here's your chance to gather with other farmers, clean seed and learn about various pieces of equipment that can be used.

The following equipment will be in the seed trailer for use:

- 18 Hand seed screens in various shapes and sizes
- Office Clipper desktop seed cleaner
- Winnow Wizard
- Sasagawa Thresher

Additional hand-scale screens, Hardware cloth for threshing, and Other small-scale tools will be on Hand to try.

We recommend that your seed crop is as dry as you possibly can make it. Bring a respirator or N95 mask, this is dusty work! If you forget them, we'll have some available.

This project is funded through a Northeast SARE farmer grant
