NO-TILL INTENSIVE TRAININGS FOR TECHNICAL SERVICE PROVIDERS

The University of Vermont Extension, in conjunction with the Natural Resources Conservation Service and The University of Maine Cooperative Extension, is offering a free [No-Till Intensive Training](#) for Technical Service Providers (TSPs)!

The No-Till Intensive Training will have three parts:

1. Webinar Trainings – *8 CCA credits, 1 Pesticide credit*
 - Each webinar will host a farmer, researcher, or other expert practitioner. The classes will discuss common obstacles to implementing a successful no-till program, address these issues through field proven technical knowledge, and follow a training plan that will best enable the TSP to support the farmers in the no-till practice transition. The webinars are scheduled to meet from 11 a.m. to 12:30 p.m. every other Monday starting on November 5, 2018 and ending on February 18, 2019.
2. No-Till & Cover Crop Symposium – *5 CCA credits per event*
 - Participating TSPs will attend both the 2019 and 2020 symposiums at no cost to them! Next year's event is scheduled for February 28, 2019 in Burlington, Vermont.
3. In-Field Intensive Training – *6 CCA credits per training*
 - Four (4) in-field intensive trainings will be offered during Summer/Fall 2019. Participating TSPs are required to attend at least one. The in-field intensives will be held in Maine, Massachusetts, and Vermont. They will be hosted by local collaborating farms that have incorporated no-till into their crop management systems. These hands-on workshops will foster a stronger working

knowledge of no-till equipment, soil health, fertility, and technology used to make no-till systems successful.

Enrolled TSPs must commit to attend ALL webinar trainings and ONE in-field intensive training.

To register, go to <https://no-till-intensive-trainings.eventbrite.com>. Or contact Catherine Davidson at (802) 524-6501, ext. 445, with registration and/or training related questions. Please request a disability-related accommodation upon registering if needed.

This material is based upon work supported by the National Institute of Food and Agriculture, U.S. Department of Agriculture, through the Northeast Sustainable Agriculture Research and Education program under sub-award number ENE18-149.
