

Range Monitoring Group Pilot Project Ranch Conversation
Chris and Gari King Ranch, Winnett, Montana, April 22, 2022

Peter Donovan prepares soil stability demonstration while Rick Caquelin, Bill Milton and Roland Kroos look on

Infiltration Demo: Three soil samples taken in close proximity, but with different vegetation cover and soil properties

Let it rain!

Differences in runoff water quality

Slake test: low organic matter and poor structure versus higher organic matter and strong granular structure (aggregation)

In the field, Rick Caquelin and Peter Donovan setting up infiltration rings

Sharing perspectives and learning together through conversation: Bill Milton, Chris King, Roland Kroos

Bill Milton and Chris King discussing everything
