Combined Classroom and Boots-on-the-Ground Workshop

June 4-5 | 8 a.m.-8 p.m. | \$100/person
Morning coffee, snacks and lunch each day, plus a farm-to-table dinner on Friday night.

Classroom portion:

University of Idaho Research Park
958 S. Lochsa Street
Post Falls, Idaho

Field portion:

Lazy JM Ranch
John and Betty Mobbs
13801 North Matheson Road
Hauser, Idaho

This hands-on workshop starts with a morning classroom portion at the UI Research Park. Lunch is followed by the hands-on sessions held at the Lazy JM Ranch, located approximately 30 minutes north of the UI Post Falls classroom.

Locally produced beef will be featured for the Friday dinner, with a social hour before dinner followed by a short program.

There will be plenty of opportunities for interacting with our ranch hosts, speakers, and other attendees at this first-ever North Idaho Regenerative Ranching workshop.

Keynote Speaker | Larry Cundall

Soil Health & Grazing for Resiliency

Larry Cundall is a 4th generation rancher from Glendo, Wyoming. He manages his 20,000 acre ranch for increased productivity and resiliency while protecting wildlife and natural resources for future generations. He enjoys sharing his experiences for managing cattle, soil and grass. His ranch has received numerous awards, including the Wyoming Environmental Stewardship Award by the Stockgrowers in 2018 and was a regional winner of the 2019 Environmental Stewardship Award.

In this workshop, you will learn to enhance your grazing management skills in order to improve your forage and livestock production. Learn how to reduce time and money spent fertilizing, harvesting and feeding hay while improving your pastures and the bottom line. A hands-on approach gives you confidence in learning techniques to put into practice on your own operation.

Workshop Topics

- Management-intensive grazing
- Pasture evaluation and renovation
- Power fencing options, equipment and tools
- Grazing cell design
- Soil health and nutrient cycling
- Economics of management intensive grazing
- Grass finishing techniques
- Direct to consumer marketing

Teaching Staff

- Chad Cheyney, retired UI Extension faculty member from Arco, who developed the award-winning Lost Rivers Grazing Academy in Salmon.
- Scott Jensen, UI Extension Educator in Owhyee County, another Lost Rivers Grazing Academy faculty member and animal scientist who teaches programs on beef cattle, range and pasture management.
- Kate Painter, UI Extension Educator in Boundary County, also a frequent Lost Rivers Grazing Academy teacher and ag economist.
- Gray Henderson, retired University of Missouri soil scientist with a fascination for regenerative agriculture.
- John and Betty Mobbs, our hosts and owners of Lazy JM Ranch, speaking on bale grazing, pasture renovation, grass finishing and marketing.
