

Attachment 3: Compost Certification Fact Sheet

Work in progress

This fact sheet will act as a useful guide to distinguish various “green” labels. The details are actually not hard to understand! But they’re hidden by a lot of vague and misleading terminology. Hopefully we condense most of the need-to-know information to one page for other farmers and consumers.

Logo	Organization	Specifications	Translation
			
		ASTM D6400	
			
			European standard
		AS 5810-2010 ABAP 20007	bioplastics only
		AS 4736-2006 ABAX 9999	

* add ASTM as its own row in the table to explain how manufacturing standards work for something like this. Will also show how self-referential the system is

Terminology
Biodegradable vs Compostable vs Degradable
