

## WHO AM I

I am a woman, wife, sister, mother and a farmer. I know how to plant banana, taro, breadfruit and yam. Mostly local and traditional crops for the benefit of my small family. I grew up learning all of this from my parents. I do not know science but I do understand that when I see a banana not growing well, I know then something is not right. Something is happening that is causing the plant to react and die. It is either in the soil or something else that is causing it.

## CONTACT SOMEONE WHO KNOWS WHAT THEY ARE DOING

I contacted the Currie's, Totoa Currie and W. James Currie and they collaborated with people who are in the business of agriculture. Totoa is the technical person who has taken care of the project
