"Organic Cropping Systems for Agriculture Professionals"
A Professional Development Course

Register soon! Contact Nicole McNeil, 814.422.0251 x213,
nicole@paorganic.org, www.paorganic.org/SAREconference

Location: State College PA, location details will follow

What: PCO, in collaboration with Penn State researchers and Extension, will conduct a workshop on approaches to reducing tillage in organic grain and forage systems, based on results from research conducted in the Mid-Atlantic.

Who should attend: This training is designed for extension, government agency, and public or private sector professionals who work with grain and forage farmers who are transitioning, certified organic, or conventional and considering transition.

Goal for the workshop: Participants will increase their knowledge and confidence for serving transitioning and certified organic producers.

Location and Logistics: The workshop will be held in the State College, PA area. Exact location to be determined. Registration is free but you must apply since space and funds are limited. Lunch will be provided.

CCA/pesticide credits and reimbursement for mileage will be available.

To Register: Contact Nicole McNeil, 814.422.0251 x213,
