

## Up-Pot Addendum

Bedshaping and initial spring planting at NWREC and Woodhall sites, respectively, 2018.

Spring-planted fields at both sites fully planted as of June 2020; fall-planted fields in progress.

2020 marked our largest plantings yet, as 3 year old/6 gallon pot sized trees were moved from the protective structures, and transplanted in the fall-planted fields at NWREC and Woodhall.

A trailer filled with 120 trees for the fall-planting at Woodhall; Heather Stoven planting trees at Woodhall, November 2020.

Field work continued throughout 2020: Javier Fernandez-Salvador and Tessa Barker begin pruning trees in the field at NWREC (left); Fernandez-Salvador trains a group of students on irrigation installation at Woodhall (right).

The Olea Olive Research Team won a university award for dedication and continued service throughout the covid-19 pandemic (left); trees at Woodhall produce mature fruit for the first time since the launch of the project (right).
