

Why are our seeds so special?

The seeds are carefully hand packed by our local 18-21 special needs program. This innovative program cultivates job readiness and is designed for young adults with special needs who need extra time to transition from high school to adulthood.

Most of our seeds are grown locally by 18-21 program participants and volunteers.

All seeds are NON-GMO and grown without chemicals. We use organic food, good dirt, clean water, and fresh air.

100% of the proceeds go to this project.

To purchase some of our seed packets, please visit:

Theglp.org and pick "Seed Packets By Theglp" at the top of the screen

Everybody Grows Seed Project by The Gifted Learning Project and supported by SARE.org (Sustainable Agriculture Research and Education Project)

Using sustainable methods, the program assists beginning farmers with special needs to sell heirloom seeds and vegetables directly to chefs and communities. As a result of seed saving and collecting, the beginning farmers will grow several types of heirloom open non-GMO seeds and sell them.
